ENLARGEMENTS

Each enlargement is produced by the photographer with the same care she puts into creating a fine art piece. Working with a pigment-based printer in her digital studio, she will reprint an image (at no additional charge) until she is satisfied that it has met its full aesthetic potential. Highest quality papers are used, guaranteeing longer-lasting, beautiful photographs.

ARCHIVAL PRINTS

Archival prints are made on 100% cotton, museum-quality paper. Both glossy and matte prints are available.

Each image selected for enlargement is given special consideration, taking into account both technical details (contrast, saturation, cropping, etc.) and physical details (from stretch marks to grass stains). The image will be retouched and reprinted until the photographer is satisfied that it has met its full aesthetic potential. Because of the time and cost of extra paper that may be involved in this process, **a one-time artwork fee of \$30 per image will be charged.**
